

Find the Solution for the following:

1. What privilege should a user be given to log on to the Oracle Server? Is this a system or an object privilege?

The user be given the create session privilege. This is a system privilege.

2. What privilege should a user be given to create tables?

The user should be given the create table privilege.

3. If you create a table, who can pass along privileges to other users on your table?

only the table owner can grant privileges to other users on that table.

4. You are the DBA. You are creating many users who require the same system privileges. What should you use to make your job easier?

use a role to group privileges & then grant the role to users.

5. What command do you use to change your password?

Password:

6. Grant another user access to your DEPARTMENTS table. Have the user grant you query access to his or her DEPARTMENTS table.

7. Query all the rows in your DEPARTMENTS table.

8. Add a new row to your DEPARTMENTS table. Team 1 should add Education as department number 500. Team 2 should add Human Resources department number 510. Query the other team's table.

9. Query the USER_TABLES data dictionary to see information about the tables that you own.

10. Revoke the SELECT privilege on your table from the other team.

11. Remove the row you inserted into the DEPARTMENTS table in step 8 and save the changes.

⑥ Grant select on departments to other-users;

⑦ select * from departments

⑧ insert into departments (department-id, department-name)
values (510, 'Human resources');
Commit

- ⑨ Select * from users-tables;
- ⑩ Revoke select on departments from other-team;
- ⑪ Delete from departments
where department-id = 500;
COMMIT
